A junior web developer with a strong passion and proficiency in building front-end web applications using React and MERN full-stack web application. Currently seeking opportunities in front-end development to create a creative and functional web application. Willing to learn new skills and workplace culture to be the best fit to the team.

Thai citizen with full-time work right (Temporary Graduate Visa). Academic transcripts and professional references available upon request.

KEY SKILLS SUMMARY

- Strong foundations in web development languages (HTML, CSS and JavaScript).
- Proficiency in front-end web frameworks and libraries (React, Redux Toolkit, Material UI etc.).
- Capability in developing a full-stack web application using MERN stack.
- Strong knowledge in back-end development (NodeJS and Express).
- Knowledgeable in Git version control.

PROJECTS (see more projects [here](#))

The Soccer App Project ([See Project](#)) ([See Source Code](#))

- A soccer web application built with React, Material UI and Firebase as database.
- Fetches data from football API.
- A good practice for HTTP request handling, Material UI, and Redux Toolkit.

Band Picker MERN Project ([See Project](#)) ([See Source Code](#))

- A MERN full-stack web application that allows users to create a band of their own using data from the database.
- An excellent practice for building a full-stack web application and HTTP request handling.

CERTIFICATES

[Udemy] React Tutorials and Projects ([See Certificate](#))

- An online React course that covers React concepts from basic to advance and projects.
- Topics include component concept, React Hooks, Redux Toolkit, React Router etc.

[Udemy] MERN Stack – MongoDB, Express, React, NodeJS ([See Certificate](#))

- An online MERN course that covers integration of 4 different tools to build a full-stack web application
- Heavily focuses on creating a server with authentication, handling HTTP requests and building responsive web page with good-looking UI.
